

Child's Fingerprinting Program

Officers from the Winston Salem Police Department Crime Prevention Unit will attend an event to take fingerprints of Children ages 4-14. The Crime Prevention Officer will supply the ID kits; and the parents take the kits home with them once the fingerprints have been taken.

The purpose of the program is to provide parents with a permanent record of their child's fingerprints in the event the child is reported missing.

Parents or guardians must be present with the child and give permission before the child can be fingerprinted.

For information on how to request this program, please contact the Crime Prevention Office at 336-773-7835.
